## M.D. Rejuvenation Procedures

**Neurotoxin** - For relaxing facial muscles to diminish frown lines, crow's feet, nasal bunny lines, forehead creases, and gummy smile. Combined with a filler can be used to achieve an optimal result:

*Xeomin \* Dysport \* Jeuveau*

**Fillers** - A variety of short acting to semi-permanent fillers are offered to diminish expression lines and scars:

*Belotero \* Radiesse \* Restylane \* Evolysse*

**Sculptra Revolumizing** - The "liquid facelift" to restore facial volume loss and lift the skin resulting in a fresher and more youthful appearance. This is a non-surgical injectable product with no down time. A series of treatments are necessary for optimal results.

**Photodynamic Therapy (PDT)**  
Skin retexturing procedure utilizing aminolaevulinic photosensitizer and LED light activation to stimulate collagen, refresh skin and smooth texture.

**Sclerotherapy** - For the reduction of spider veins on the legs, injections are performed to the affected areas followed by the use of support hose to achieve optimal results.
